The Dallas Diamonds Support Henry Wayne Gorder

by Laura Walton

Henry has Neurofibromatosis (NF1). This disorder can result in tumors to develop anywhere in his body, at any time. It affects 1 in 3,000 people and is more prevalent than Cystic Fibrosis, hereditary Muscular Dystrophy, Huntington's disease and Tay-Sachs combined.

NF is unpredictable. It shows no mercy to age, race or gender. To date, there are only a few effective treatments. There is no cure. We intend to change that.

NF can take Henry's sight and hearing; and his ability to learn, walk, talk and run like other children. His future is in the hands of NF and the fate it decides. So, please join us. Help us fight this disorder and change the course of Henry's life. Join us with Team Henry and make a difference in the fight to put a stop to NF.

100% of all money raised will go towards research.

For more information go to:
