The Gilbert Family Neurofibromatosis Institute at Children’s National Hospital is hosting a virtual learning event to support children and families with Neurofibromatosis (NF).

Saturday, September 18th
9:30 am – 12:00 pm

To register please visit:
childrensnational.org/NFDay2021

- Children’s National clinicians and researchers will present the latest information on a variety of NF topics
- Presentations will address common questions and concerns related to sleep, learning and pain management
- Overview of current research studies that you and your family may be interested in
- Participants will be able to engage with presenters and ask questions
- All families of children with NF are invited to participate
- Presentations will be recorded and available if you are unable to attend
