1 in 3,000 births has neurofibromatosis, or NF, a genetic disorder that causes tumors to grow on the nerves. It affects all populations, genders & ethnicities equally.

The Children's Tumor Foundation (CTF) matches patients to NF clinical trials. NF Clinic Network treats over 15,000 patients per year in 60 clinics.

The CTF research portfolio is dedicated to funding promising research that will lead to effective treatments. The Children's Tumor Foundation NF Registry matches patients to NF clinical trials.

Over 80% of donations go directly to research or programs.
